

Fluffy Slime

Supplies

- 2/3 cup White Glue
- 1/4 Water
- 1/2 tsp Baking Soda
- 2-3 cups Shaving cream
- 1.5 tbsp Contact Solution
- Bowl
- Spoons
- Optional: Food Colouring

Time Required

- 10 minutes to prep

Steps

1. Add white glue to bowl. Followed by water and baking soda. Mix well!
2. Add you shaving cream and mix until smooth.
3. Add contact solution slowly (I did half a tablespoon each time). Mix well in between contact solution to start seeing slime consistency.

Note: If your slime is too sticky - add a little extra contact solution

4. Optional - Add food colouring at end or mix in when still watery to give your fluffy slime a fun look but be ready for your hands to get some colour as well.
